EDUCATION

Indian Institute of Information Technology Agartala

Bachelor of Technology in Computer Science & Engineering

Tripura

2022 – 2026

EXPERIENCE

Software Engineering Intern

Feb. 2026 – July 2026

Inkle

Bangalore, Karnataka, India

- Built and shipped **15+ full-stack features** using React/TypeScript and Django for a B2B SaaS serving **1,000+ customer accounts**.
- Built the **1120 tax tracker** with priority scoring, daily Celery recomputation, validation gates, Slack alerts, and filterable ops/client views, reducing manual tracking effort by **60%**.
- Automated IRS AcroForm generation for **Forms 8802/8822-B** with reusable pypdf tooling and migrated document generation to WeasyPrint, cutting generation time by **70%**.
- Redesigned sign-in to capture **entity type, tax classification, and business details upfront**, reducing tax-profile collection from days to **minutes** and eliminating **200+ monthly follow-ups**.
- Implemented timezone-aware agent auto-assignment with midnight-crossing shift detection, exclusions, and load-balanced fallback for **20+ agents**.

Google Summer of Code 2025 Mentee

May 2025 – Sep. 2025

GNU Image Manipulation Program

Remote

- Built a new website for GIMP's extension platform using Hugo, implementing GitLab CI pipelines to automate extension validation and metadata page generation.
- Delivered a secure, maintainable static site with essential dynamic components, accepted upstream by the GIMP project.

Software Developer Intern

Dec. 2024 – May 2025

Kickoff

Remote

- Built a production-ready unified dashboard consolidating **5+ POCs** using React.js, Redux Toolkit, Tailwind CSS, and scalable state management.
- Integrated Gong via REST APIs to sync **1,000+ conference calls**, and managed CI/CD pipelines and DigitalOcean deployments, reducing deployment overhead by **40%**.
- Built a customer-facing voice support feature integrating **Retell AI**, enabling customers to interact with AI voice agents and reducing initial support response time from hours to **minutes**.

PROJECTS

Mnemosyne - Semantic Image Search | *FastAPI, React, jina-clip-v2, LanceDB*

Nov. 2025

- Ran a 0.9B multimodal CLIP model locally to embed images and text into a shared 512-dim vector space, enabling natural language and image-to-image similarity search with no external APIs.
- Built a full-stack system with a FastAPI backend (vector indexing, ANN search, file watcher for auto-ingestion) and a React/TypeScript frontend with drag-and-drop upload, dual-mode search, and an image similarity flow.

Ciphera - Secure Messaging App | *Flutter, Matrix, Synapse, Hive, Dio*

Oct. 2024

- Built a Flutter multi-platform secure messaging app using Matrix protocol; awarded 1st Runner-Up at Ethos 2024 hackathon.
- Implemented the registration backend integrated with a Synapse server for secure account creation and authentication.

Stellar Minesite | *Python, Scikit-learn, TensorFlow, Streamlit, React.js*

Aug. 2024

- Won ISRO Space Hackathon at NIT Agartala with an ML platform for mining site analysis and sustainable site recommendations.
- Trained a Random Forest classifier and built an interactive Streamlit interface for customizable site preference inputs.

TECHNICAL SKILLS

Languages: Python, C/C++, SQL, JavaScript, TypeScript, HTML/CSS, Bash, Go

Frameworks: React.js, Next.js, Node.js, Flask, Django REST Framework

Developer Tools: Redis, Docker, Git, Postman, Linux, Figma
