EDUCATION

Indian Institute of Information Technology Agartala

Bachelor of Technology in Computer Science & Engineering

Tripura

2022 – 2026

EXPERIENCE

Software Engineering Intern

Feb. 2026 – Present

Inkle

Bengaluru, India

- Engineered full-stack features across React and Django, merging 71 PRs in 3 months on a production B2B SaaS serving US businesses for accounting, bookkeeping, and tax compliance.
- Redesigned the end-to-end customer sign-up flow — entity type selection, conditional state/country fields, and URL routing — reducing onboarding drop-off for new users.
- Built a timed broadcast banner system and auto-agent assignment for the ops dashboard as full-stack features (Django REST + React), improving real-time customer communication.
- Enhanced Task Tracker with group-based sorting, sticky UI, and configurable CSV exports; migrated PDF generation to WeasyPrint, resolving cross-document layout inconsistencies.

Google Summer of Code 2025 Mentee

May 2025 – Sep. 2025

GNU Image Manipulation Program

Remote

- Built a new website for GIMP's extension platform using Hugo, implementing GitLab CI pipelines to automate extension validation and metadata page generation.
- Delivered a secure, maintainable static site with essential dynamic components, accepted upstream by the GIMP project.

Software Developer Intern

Dec. 2024 – May 2025

Kickoff

Remote

- Built a production-ready unified dashboard consolidating multiple POCs using React.js, Tailwind CSS, and scalable state management.
- Integrated Gong via REST APIs to sync conference call data; managed CI/CD pipelines and deployments on DigitalOcean.

PROJECTS

Semantic Image Search | Sentence Transformers, LanceDB, Google GenAI SDK, Ollama

Nov. 2025

- Built a multimodal search system retrieving local images via natural language using VLMs and a RAG-like pipeline with LanceDB vector storage.
- Designed a modular AI provider plugin system enabling seamless switching between local (Ollama) and cloud (Gemini) inference via configuration.

Ciphera - Secure Messaging App | Flutter, Matrix, Synapse, Hive, Dio

Oct. 2024

- Built a Flutter multi-platform secure messaging app using Matrix protocol; awarded 1st Runner-Up at Ethos 2024 hackathon.
- Implemented the registration backend integrated with a Synapse server for secure account creation and authentication.

Stellar Minesite | Python, Scikit-learn, TensorFlow, Streamlit, React.js

Aug. 2024

- Won ISRO Space Hackathon at NIT Agartala with an ML platform for mining site analysis and sustainable site recommendations.
- Trained a Random Forest classifier and built an interactive Streamlit interface for customizable site preference inputs.

TECHNICAL SKILLS

Languages: Python, C/C++, SQL, JavaScript, TypeScript, HTML/CSS, Bash, Go

Frameworks: React.js, Next.js, Node.js, Flask, Django REST Framework

Developer Tools: Redis, Docker, Git, Postman, Linux, Figma
